

Welcome Autumn!

END OF YEAR REMINDER

As the end of 2023 nears, be sure to use your **dental insurance coverage** before it's gone! Our Insurance Coordinator (*Michelle*) or Financial Coordinator (*Venus*) are happy to discuss easy payment options and **scheduling** that may maximize your benefits.

COSMETIC DENTISTRY

Not only does an attractive smile enhance one's facial appearance, research has shown that smiling perks up your mood!

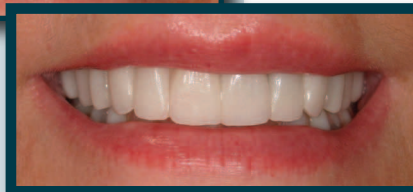

We offer all options to **improve a smile's appearance**, including porcelain veneers, porcelain crowns, whitening and all tooth replacement options. These can beautifully repair chips, broken teeth, crooked and crowded teeth, worn teeth, uneven gum lines and missing teeth - all with a natural look and feel.

I hold mastery status from one of the most prestigious esthetic institutes in the world and have advanced

BEFORE

AFTER

training in neuromuscular dentistry. This provides patients with exceptional results *beyond expectations!*

See some of these smile transformations on our **Smile Gallery** at WhereLastingSmilesBegin.com. To discuss smile enhancements, ask at your next visit or call for a consultation.

STAFF UPDATES

JESSICA, our Neuromuscular Assistant, recently welcomed an addition to her family. Congrats on her precious bundle!

Registered Dental Hygienist **AMANDA** is expecting a little one in October. We wish her all the joys of motherhood!

NEW SMILES WELCOME!

We are always happy to accept new patients and especially appreciate welcoming those who are referred by an existing patient! Thank you for recommending our care to your friends and family!

DENTAL FEAR

An estimated 70% of American adults avoid or delay dentistry due to dental fear or anxiety. When regular dental care is put aside, it can lead to problems that may have been avoided and even develop into something more complex.

We have helped many patients overcome their fears - *often for good!* I've developed a reputation for "*painless*" injections but also understand the need for compassion, respect and pacing treatment for each individual.

In addition to special features and advanced technology for comfort, we offer oral and I.V. sedation ("*twilight sleep*"). You can learn more by downloading a booklet from our website:

"Guide for The Fearful Dental Patient."

Let us help you or someone you know get past fear or anxiety and achieve a healthy, confident smile!

Wishing you smiles and happiness throughout the coming holidays!
